Summary

Computer Science graduate from Debre Tabor University who builds full-stack web applications with React, Next.js, TypeScript, PHP and Python. Built a food delivery system for Debre Tabor City as a final-year project, then a peer-to-peer car rental platform and a food-ordering app in Addis Ababa. Currently studying Full Stack Development at IBT College.

Skills

- **Frontend:** HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS
- **Backend:** PHP, Python, Prisma, REST APIs
- **Database:** MySQL, PostgreSQL
- **Tools:** Git, GitHub

Projects

Sheger Wheels – Peer-to-Peer Car Rental Platform | Oct 2026

- Built a web platform that connects car owners with renters in Addis Ababa.
- Implemented car listings, booking management, user authentication and rental administration.
- Stack: Next.js, TypeScript, Prisma, PostgreSQL.

Addis Eats – Food Ordering Web App | 2026

- Built a responsive frontend for browsing food, managing a cart and placing orders, with order tracking and a staff kitchen board.
- Stack: React.js, Next.js.

Food Delivery Website – Debre Tabor City | 2025 – 2026

- Final-year Computer Science project: a web-based system for food ordering and delivery management.
- Stack: PHP, MySQL.

Education

Full Stack Development – IBT College, Addis Ababa | 2026 – Present

Bachelor of Computer Science – Debre Tabor University, Debre Tabor | 2022 – 2026
